Any Wi-Fi enabled device is able to connect to the internet via SecureVision Wi-Fi service. A few popular devices are listed below.

Please note:

Some devices have a physical toggle switch to turn the wireless on or off. Other devices use keyboard hotkeys to toggle wireless on and off. Wireless must be turned ON in order to complete steps 3 through 8.

These instructions are a general guide. It may be necessary to refer to user manual for the device(s) for further details.

To connect to the internet:

- 1 Confirm that wireless capable device is powered on.
- 2 Confirm that wireless (Wi-Fi) is active on the device.
- 3 Open wireless control center on the device.
- 4 View available wireless networks on the device.
- 5 Find the wireless (Wi-Fi) access point that is associated with your location.
- 6 Select the "connect" option for that wireless (Wi-Fi) network.
- 7 No login is required to use the SecureVision open wireless service.
- 8 Open a browser session to verify connection to internet.

Programming Subject to Change.
