

May 17, 2021

Dear Residents,

GCI Consultants is assisting the Association with inspections of all windows and doors on the property for damage from Hurricane Sally. Our inspectors will be conducting a detailed examination of the entire window or sliding glass door assembly to look for any evidence of windstorm damage starting on May 24, 2021 through May 28, 2021. Please allow the inspectors to look at your windows and doors, even if you do not think there was any damage. They are experts and often spot things that others might not.

It is very important that the inspectors be allowed to inspect every window and door throughout the entire property to help the association put together a full and complete claim for the insurance company.

Please, make sure that all furniture blocking the windows is removed. Also, have your blinds and shades open for the inspectors. If the window is not accessible it won't be inspected.

Thank you for your cooperation.

GCI Consultants, LLC
